Dear Waterworks Owner/Operator:

RE: Precautionary Drinking Water Advisory for *Uranium City Waterworks* - Rescinded

Please be advised that the long-standing drinking water advisory for the northern settlement of Uranium City has been rescinded. The Uranium City Waterworks has been reclassified as a hygienic (non-potable) waterworks and is no longer considered a waterworks that produces water for human consumption. The water produced at this waterworks is for bathing purposes only. A new point of use reverse osmosis system has been installed in the settlement shop where residents can fill water jugs for consumption purposes. Bacteriological sampling will be conducted on both the hygienic system and the reverse osmosis system per the permit to operate.

For further information please do not hesitate to contact the undersigned at (306) 960-6290 or neil.hodges@wsask.ca.

Sincerely,

Neil Hodges
Environmental Project Officer
